

Anjali Suman

Data Science & Statistics

✉ anjali.suman.stats@gmail.com

🌐 github.com/AnjaliML

Profile

Statistician with experience in applied research and Python development. Work spans Bayesian optimisation, survival analysis, data exploration and reproducible learning resources.

Technical Skills

Programming	Python, R, MATLAB; working knowledge of C/C++
Data & ML	pandas, NumPy, scikit-learn, PyTorch, statistical modelling, data visualisation
Tools	Jupyter, Git/GitHub, L ^A T _E X

Selected GitHub Work

- 2026 [Data Science Python 101](#), *Python learning resource*
Wrote lessons and exercises; added automated checks and improved site accessibility. Covers data preparation, analysis and model evaluation.
- 2024–25 [ML101](#), *Machine learning notebooks*
Implemented examples of Gaussian process regression, Bayesian optimisation and related methods.
- 2024 [findingPi](#), *Numerical computing notebooks*
Explored algorithms for estimating π and plotted their convergence.
- Earlier work [Inter-state migration analysis](#) (2022); [fantasy-cricket score modelling](#) (2017).

Research & Experience

- 2022–Apr 2025 **Research collaboration**, *Oklahoma State University (remote)*
Investigated temporal Bayesian optimisation and machine-failure prediction using survival analysis.
- 2019–20 **Design & Analysis**, *Sureland Industrial Fire Safety Limited*
Analysed fire-incident data and smoke-detector placement.

Education & Development

- 2026–present **Data Science with Machine Learning & AI Career Accelerator**, *University of Cambridge Professional and Continuing Education / FourthRev*
In progress; applied statistics, Python and data-science projects.
- 2018 **M.Sc. Statistics**, *Hindu College, University of Delhi*
- 2016 **B.Sc. (Hons) Statistics**, *Ramanujan College, University of Delhi*
- 2026 [Understanding the GDPR](#), University of Groningen via FutureLearn; Certificate of Achievement, 97%.
